Experience

Web Developer

ShiffiShutterz Studios

Lagos, Nigeria 03/2017 - Current

- Developed and managed the business's official website from the ground up while maintaining industry-standard practices, responsiveness and web accessibility using **JavaScript, HTML, CSS, PHP and jQuery**.
- Presided over meetings with the owner on the implementation of appropriate profitable business features.
- Responsible for the addition of new content on the website after every completed photoshoot and image processing.
- Manage the Google Business page and improved the general SEO performance of the company by up to 80%
- Responsible for maintaining maximum website up time of 99.9999% through proper management of hosting and DNS services.

Software Developer

KYD Evolution

Nigeria 01/2013 - 07/2015

- Part of a small team of developers that built student-focused software products that addressed some societal and technological gaps using **HTML, CSS, jQuery, JavaScript, and PHP**.
- Played an integral role in a team that developed a social network website that grew to over 2000 students connecting and sharing updates.
- Developed an e-Voting management system with other team members that facilitated faculty and departmental student body elections across the school. Used by the largest faculty in school at the time with well over 1000 students voting simultaneously.

Software Development Intern

Netop Business Systems

Lagos, Nigeria 10/2013 - 04/2014

- Assisted in the development of enterprise business software that provides diverse range of information technology services to both private and public sectors.
- Tools used include: **C#, ASP.NET, VB.NET, MySQL, MVC etc.**

Projects

- **REST Countries API:** A web app that uses an online Rest API to fetch over 200 countries and display detailed information about each country. | **HTML, CSS, JavaScript, React, FetchAPI, Chakra-UI, NextJS, Vercel, Git, GitHub**
- **GitHub User Search App:** Developed a web app that connects and uses GitHub API to fetch registered users information from the platform and display in an aesthetically pleasing way. | **HTML, CSS, JavaScript, FetchAPI, Git and GitHub.**
