Countries (https://countries-phi-ruby.vercel.app/) - **React | TypeScript | NextJS | Chakra-UI | REST API | Vercel**
- Web app that integrates with REST Countries API, fetches data from it and displays detailed data about more than 200 countries in an aesthetically pleasing UI.

DevFinder (https://emmanueloloke.github.io/github-user-search-app/) - **HTML, CSS, JavaScript, FetchAPI, Git, and GitHub**
- A web application that utilizes GitHub API to fetch information about any of the platform's over 80 million users and displays in an elegant and clean user interface.

Experience

Freelance Web Developer   **ShiffiShutterz Studios**   *Lagos, Nigeria*   **03/2017 - Current**

- Spearheaded the design, building, and management of the business's official website from the ground up while maintaining industry-standard practices, responsiveness, and web accessibility using **JavaScript, HTML, CSS, Laravel, and jQuery** that led to over 80% increase in customer acquisition and retention.
- Presided over meetings with the owner to implement appropriate profitable business features, leading to over 60% increase in revenue.
- Manage the Google Business page and improved the general SEO performance of the company by up to 90%
- Responsible for maintaining maximum website up time of 99.9999% through proper management of hosting and DNS services.

Software Developer   **KYD Evolution**   *Nigeria*   **01/2013 - 07/2015**

- Part of a small team of developers that built student-focused software products that addressed some societal and technological gaps using **HTML, CSS, jQuery, JavaScript,** and **PHP**. Making some manual processes 100% digital.
- Played an integral role in a team that developed a social network website that grew to over 2000 students connecting and sharing academic and social updates.
- Implemented an e-Voting management system with other team members that facilitated faculty and departmental student body elections across the school. A service employed by the largest faculty in school at the time, with well over 1000 students voting simultaneously.

Software Development Intern   **Netop Business Systems**   *Lagos, Nigeria*   **10/2013 - 04/2014**

- Assisted in developing enterprise business software that provides various information technology services to over 20 private and public sector businesses. The tech stack includes **C#, ASP.NET, VB.NET, MySQL, MVC, etc.**
