EMMANUEL OLOKE

SOFTWARE ENGINEER

dapopeemmanuel@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Software Engineer building fintech and payments systems using React, TypeScript, and Node.js. Delivered production features used by 30,000+ users, including a cross-border settlement platform that processed $50K+ in its first week. Experience across startup fintech, enterprise systems, and open-source platforms.

EXPERIENCE

KiaKia Finance Remote

Software Engineer *Sep. 2023 - Present*

- Led the end-to-end development and launch of a cross-border settlement platform enabling multicurrency transactions across jurisdictions, processing $50K+ in transaction volume within 7 days of launch.
- Own and maintain key frontend architecture powering currency exchange for 30,000+ users, driving measurable gains in performance, reliability, and scalability through code-splitting, lazy loading, and asset optimization, cutting page load times by 20%.
- Optimized mission-critical workflows for currency pair trading and invoicing, directly contributing to a 30% increase in business revenue and improved customer retention.
- Spearheaded Agile delivery as Technical Lead, managing end-to-end task lifecycles in JIRA, facilitating sprint planning, and authoring release documentation that ensured 100% cross-team alignment across engineering, product, and design for on-time feature launches.

Plethub Remote

Software Engineer *Mar. 2023 - Sep. 2023*

- Delivered frontend applications for enterprise clients, including CWG Plc and FMN, enhancing usability and performance across financial and public-sector platforms.
- Boosted user engagement by 20% through targeted improvements to UI consistency, responsiveness, and accessibility across high-traffic web applications.
- Reduced production issues and downtime by 25% by strengthening frontend stability, error handling, and deployment practices, ensuring a more reliable user experience.
- Shipped production-ready features under tight deadlines in a fast-paced delivery environment, collaborating cross-functionally to maintain quality and velocity.

Loopsave Limited *(GitHub Link)* Remote
Full Stack Software Engineer

- Built backend services using Java Spring Boot and REST APIs to support a social finance platform.
- Developed responsive frontend interfaces with Next.js and TypeScript, integrating APIs and handling real-time user interactions.
- Owned the Referral System feature delivery from API design to Frontend implementation and deployment using Kubernetes and Terraform.

PROJECT

Made in Nigeria *(GitHub Link)* Remote
Software Engineer *Sep. 2022 - Sep. 2023*

- Refactored the frontend architecture of an open-source platform, improving UI responsiveness by 40% and boosting Lighthouse SEO performance.
- Co-built and maintained a curated registry of 100+ developer tools, increasing global contributor engagement by 50%.
- Improved maintainability by introducing better component structure and development practices, reducing long-term technical overhead.
- Contributed to a full platform redesign, improving usability and increasing adoption.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript
Backend: Node.js, Express, Java (Spring Boot), REST APIs, GraphQL
State & Data: React Query, Jotai, React Hook Form, Zod
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: GCP, AWS, Docker, Kubernetes, Terraform**,** GitHub Action
UI: TailwindCSS, Chakra UI, Material UI, ShadCN

CERTIFICATES

Google Cloud Platform (GCP): Associate Cloud Engineer *Certificate Link*
British Computer Society (BCS): Level 4 Certificate in IT

EDUCATION

Rivers State University Port-Harcourt, Nigeria
MSc. Computer Science *Graduation Date: Dec 2023*

University of Ilorin Ilorin, Nigeria
BSc. Computer Science *Graduation Date: Aug 2015*
