EMMANUEL OLOKE

SOFTWARE ENGINEER

+2348064879171 | dapopeemmanuel@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Software Engineer building fintech and payments systems using React, TypeScript, and Node.js. Delivered production features used by 30,000+ users, including a cross-border settlement platform that processed $50K+ in its first week. Experience across startup fintech, enterprise systems, and open-source platforms.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript
Backend: Node.js, Express, Java (Spring Boot), REST APIs, GraphQL
State & Data: React Query, Jotai, React Hook Form, Zod
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: GCP, AWS, Docker, Kubernetes, Terraform**,** GitHub Action
UI: TailwindCSS, Chakra UI, Material UI, ShadCN

EXPERIENCE

KiaKia Finance Lagos, Nigeria (Remote)
Software Engineer *Sep. 2023 - Present*

- Led the development and launch of a cross-border settlement platform, enabling merchants to process multicurrency transactions across jurisdictions; processed $50K+ in transaction volume within 7 days of launch.
- Own and maintain key parts of the frontend architecture powering currency exchange for 30,000+ users, improving performance, reliability, and scalability.
- Spearheaded Agile delivery cycles by facilitating sprint planning and authoring comprehensive technical release documentation, ensuring 100% alignment between engineering, product, and design teams for on-time feature launches.
- Acted as a technical lead to optimize team velocity. Managed end-to-end task lifecycles in JIRA, maintaining a high-quality and predictable development process.
- Optimized mission-critical workflows for currency pair trading and invoicing, resulting in a 30% increase in business revenue and improved customer retention.
- Improved frontend performance by implementing code-splitting, lazy loading, and asset optimization strategies, reducing page load times by ~20% and improving accessibility standards and compliance.

Plethub Lagos, Nigeria (Remote)
Software Engineer *Mar. 2023 - Sep. 2023*

- Delivered frontend applications for enterprise clients (CWG Plc, FMN), improving usability and performance across financial and public-sector platforms.
- Improved user engagement by ~20% by enhancing UI consistency, responsiveness, and accessibility across high-traffic web applications.
- Reduced production issues and downtime (~25%) by strengthening frontend stability, error handling, and deployment practices.
- Worked in a fast-paced delivery environment, shipping production-ready features under tight deadlines while collaborating with cross-functional teams.

Loopsave Limited *(GitHub Link)* Remote
Full Stack Software Engineer

- Built backend services using Java Spring Boot and REST APIs to support a social finance platform.
- Developed responsive frontend interfaces with Next.js and TypeScript, integrating APIs and handling real-time user interactions.
- Owned the Referral System feature delivery from API design to Frontend implementation and deployment using Kubernetes and Terraform.

PROJECT

Made in Nigeria *(GitHub Link)* Remote
Software Engineer *Sep. 2022 - Sep. 2023*

- Refactored the frontend architecture of an open-source platform, improving UI responsiveness by ~40% and boosting Lighthouse SEO performance.
- Co-built and maintained a curated registry of 100+ developer tools, increasing global contributor engagement by ~50%.
- Improved maintainability by introducing better component structure and development practices, reducing long-term technical overhead.
- Contributed to a full platform redesign, improving usability and increasing adoption.

CERTIFICATES

Google Cloud Platform (GCP): Associate Cloud Engineer *Certificate Link*
British Computer Society (BCS): Level 4 Certificate in IT

EDUCATION

Rivers State University Port-Harcourt, Nigeria
MSc. Computer Science *Graduation Date: Dec 2023*

University of Ilorin Ilorin, Nigeria
BSc. Computer Science *Graduation Date: Aug 2015*
